Are you looking for the perfect outdoor experience or activity for everyone in your class?

Moccasin Trails has customized canoe tours that meet the needs of every individual in your group regardless of paddling ability, age or Experience.

Our guided canoe journeys and spiritual excursions are easily customized to meet your educational needs for a day-long local excursion or field trip.

Join us for a transformational canoe journey at a local lake or even on the South Thompson river where Indigenous Knowledge Keepers share the wisdom and local culture. These trained guides will lead members of your school/class to work together, paddling in the same direction in a beautiful natural setting.

Students will focus on the things that matter most that link to the curriculum at any grade, as they glide across the water in search of glimpses into the past and local history.

Students will navigate the water and learn about Indigenous people, beliefs, history, ethnobotany and culture and how it has evolved over time.

In advance, tell us the time frame and what you hope your students will learn from the experience. Maybe it is a deeper appreciation of indigenous culture, spiritual enlightenment, personal growth, or to learn our unique ways of life that guide Indigenous principles, values and moralities?

Do you want to include an archery challenge, visit a Traditional Winter Pit home or finish your day with a locally infused chef-prepared meal and Indigenous drumming?

Moccasin Trails has the ability to create a unique and transformative experience that will revitalize invigorate your students for years to come.

Now that's an educational experience to never forget.
